Reason for Allowance

The prior art reference of records (US Pat. 6,433,602) shows a circuit comprising first to sixth transistors connected as shown in figure 3. However, reference (US Pat. 6,433,602) fails to teach or fairly suggest a first feedback control block coupled across the first and second transistors and a second feedback control block coupled across the third and fourth transistors as called for in claims 10, 11 and 12; the feedback control blocks are transmission gates as called for in claims 13 and 14. Therefore, claims 10-14 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
